

TAR Syndrome Research Study

Happy International Celebrate being You Day!

SPEECH

Do you or your child have difficulty with speech?

FOOD PREFERENCES

Sometimes its about the food. Are they only wanting a small group of choices, do they avoid textures or colors?

FEEDING CHALLENGES

Gagging, spitting up, refusing textures..

SOCIAL PLAY

Speech and communication affect play! Are They playing with others, do they only like certain toys.

Uniquely Me is excited to announce that we are partnering with Chatterbox Therapy Center to conduct a research study for TAR Syndrome.

We need your participation to help answer the questions that are out there.

Lets chat about speech challenges, feeding difficulties or texture preferences.

YOUR INPUT MATTERS!
